

Mr. Nobody Sample Answer Key

Teachers should observe if a kid can:

1. Program Turtle Art so that running the `person` block draws a stick figure containing arms, legs, body, and head
2. Return the turtle to where the figure began drawing
3. Tackled any of the extra credit successfully

The only data I require is percentages for successful completion of each of the three objectives above. #1 is most important since it demonstrates understanding of procedurality and simple turtle geometry.
